

## PRESS RELEASE

29 January 2024

### CHT Group with innovative and sustainable printing systems at the FESPA Global Print Expo

This year's trade fair highlight is the further development of our **PRINTPERFEKT hybrid system**. We would like to present our 2-product system in Amsterdam, which offers you the advantage of only needing two instead of three products in the future to create brilliantly colored, accurate and wash-fast prints in a combination of screen and digital printing.

We would also like to draw attention to our **AQUAFLEX PRO** print transfer system, in which the properties of the screen and film have been improved. The resulting ideal flow and wetting behavior facilitates uniform, opaque prints with the valued properties of high elasticity and a soft feel.

CHT has also made some new silicone developments. Here we would like to focus on the **ALPATEC 40175A/B**. This all-rounder can be used for stable anti-slip prints on hard-to-print materials such as breeches, in embossing and in the molding process. Just one silicone for three different applications, all of which deliver convincing results.

We look forward to your visit and your projects, where we can support you. Visit our stand **D51 in hall 12** at the FESPA Global Print Expo in Amsterdam from March 19-22, 2024 and learn more about our printing solutions.

#### About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen

CHT Germany GmbH
